Subject: Invitation:Data Evaluation Report comments (Thu 08/18/2011 10:00AM, call Not responsive)

Not responsive

Please send any major issues ahead of time if possible. Also, if it looks like a call may not be necessary, please let the group know as well and perhaps we can cancel the call (only by consensus).

-----E-Mail from Alice Yeh, 7/21/11:

You may recall from past conference calls that the FFS Comprehensive Conceptual Site Model (CCSM) is being broken up into more reader-friendly (and shorter) sections. There will ultimately be a 30-page CSM that tells the story, supported by various data appendices that provide detailed information to back up that story. The data appendices (aka Data Evaluation Reports) are taken from the original CCSM chapters, updated with new information where necessary.

Following is the list of documents that make up the new "reader-friendly" CSM:

CCSM

Data Evaluation Report 1: Site Setting
Data Evaluation Report 2: Boundary Conditions
Data Evaluation Report 3: Historical Sediment Contamination
Data Evaluation Report 4: Surface Sediment Contamination
Data Evaluation Report 5: Source Pattern Analysis
Data Evaluation Report 6: Mass Per Unit Area
Data Evaluation Report 7: Biota Analysis

I am about to send you three of the 7 Data Evaluation Reports (1, 2, 5), for your review. They will be sent in separate e-mails, because the files are large - in each e-mail, I will indicate from what chapters of the original CCSM each Data Evaluation Report comes and whether there have been any substantive changes.

We are still working on the other Data Evaluation Reports.

Please send me your comments on these 3 Data Evaluation Reports by COB August 22.
